# Welcome to the Frog Street Family!

As you unpack the boxes in your new Frog Street Pre-K curriculum, we want to remind you that this comprehensive curriculum includes three digital components to support teachers and children in the classroom.

Frog Street Digital Teacher Portal offers engaging online resources to support instruction, including teacher guides, literature, lesson plans, family letters, listening library, digital images, music and more.

Frog Street Pre-K at Home is an interactive, hands-on program that provides daily, intentional lessons that are fun and easy to use! The activities are designed to deliver instruction to children and families online. All the content is aligned with the Frog Street Pre-K in-class curriculum for families at home.

AIM Observational Assessment provides teachers with an authentic assessment process to collect evidence and data in order to show progress and make developmentally appropriate instructional decisions. AIM measures 60 Learning Progressions and indicators of kindergarten readiness across four developmental domains.

Frog Street's Customer Success Team will contact your organization's administrator for onboarding these three digital resources. This includes integration of your student and teacher data for log-in access using Frog Street's Lily Pad, a single sign-on (SSO) tool providing access to all three digital products.

If you have not received login credentials to these three digital resources, please have your technology staff or early childhood leader contact Frog Street at support@frogstreet.com.

We're excited to have you join the Frog Street Family! Please contact us if you would like further support or training on your new materials!

Sincerely,
Your Frog Street Family
